

RELIABLE OILFIELD SERVICES

PERMIAN BASIN · ODESSA, TX

● FIRETUBE FAILURE CAUGHT ON A ROUTINE PM · HEATER TREATER SAVED

FIELD SERVICES · CAPABILITY OVERVIEW

Burner management, built right. **Tracked live.**

Owner-operated and Permian-built. We service every major BMS, **build our own**, and put a live, photo-documented record of every job in your inbox the same day.

WHY OPERATORS CALL ROS

The dependable partner the basin was missing.

Most BMS shops don't answer, show up late, and leave you chasing paperwork. We built ROS — and our own tools — to be the opposite.

01

We answer our own phone.

Owner-operated. The person who picks up can make the call — no dispatcher, no queue.

02

We build our own tools.

Our own ROS BMS controller and ReliableTrack field platform — not a resold box or someone else's software.

03

We live in the basin.

Every tech is Permian-based. We know the pads, the access roads, and what your safety team checks.

CORE SERVICES

SIX LINES · ONE CREW

BMS Service

Install, troubleshoot & recertify every major platform — modern, legacy, pneumatic-only.

ROS BMS

Our own Wi-Fi burner management system. Built in the Permian.

Fired Equipment

Heater treaters, line heaters, reboilers, glycol units & legacy heater systems.

Combustion Solutions

Burner sizing, flare ignition consulting & pre-inspection BMS audits.

Thief Hatches

Service, replacement & pressure-relief setting for tank-top compliance.

PSV / PRV

Bench testing, calibration, pop-off setting & written certification.

Application specialists in flares, enclosed combustors & heater treaters. We don't chase compressor-station overhauls — everything else fired, we do.

THE ROS ADVANTAGE

We don't just run the gear. We build it.

PRODUCT · ROS BMS

The first Wi-Fi BMS built in the Permian.

- Rugged 10.1" touchscreen + local Wi-Fi at igniter.local
- SCADA-ready telemetry (4–20 mA + dry contacts) standard
- Runs fully offline — no cell service, no monthly fee
- Designed, built & commissioned by ROS

\$2,000–\$2,500 / controller ● 2-year warranty

RELIABLETRACK · OUR FIELD PLATFORM

Most shops hand you a paper ticket. We hand you a **live job**.

The field platform we built and run on every callout — so the office sees the work the same day, not next week.

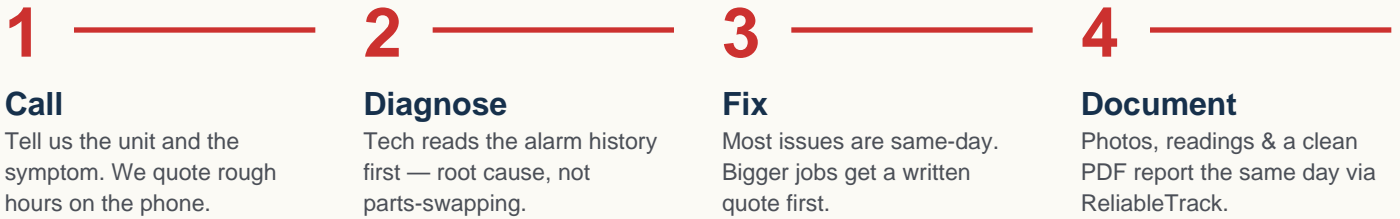

- Live ETA & live tech tracking
- Photo-documented work
- Same-day PDF service reports
- Clean digital work orders
